

HF Transceivers Military

AT Electronic and Communication International (AT) is a respected provider of tactical HF transceivers with over 20 years of experience providing solutions to global defence and security clients.

AT has established itself as a premium global Codan dealer for Codan's Military and Security range of HF transceivers. This includes popular products such as Codan's 2110M Manpack, Envoy HF Smart Radio, Codan's MR base and vehicular transceiver to provide the full range of communications capabilities (voice, data, fax, internet, chat).

The range of tactical HF transceivers to suit mobile, base and manpack applications are available with Frequency Hopping and Encrypted options with compliance to MIL-STD-188-141B ALE, FED-STD-104 ALE.

Codan's tactical HF transceivers have been deployed in active use by military and security organisations on all continents. Including over 3000 units to support security and rebuilding programs in Afghanistan and Iraq. Codan and AT prides themselves delivering leading edge solutions that provide the best reliability and battery performance in its class. All Codan HF transceivers provides intuitive user interface that operating staff will find easy to use with minimal training.

AT has established itself as the largest distributor of the Codan brand of HF Transceivers servicing markets including; military (army, navy, air force and marines), customs, border guard, coast guard, drug enforcement and private security firms.

AT works with its expanding client base delivering a comprehensive range of products to provide integrated HF systems. Solutions combine products from Codan and our accessory suppliers. Systems integration support can be supplied when configuring a solution where HF base, mobile and manpack transceivers will be functioning to transmit secure voice and data communications in a coherent package.

AT provides an extensive amount of information on this website on HF transceivers, antennas, power supplies, frequency hopping, encryption, remote control, amplifiers, data terminals, repeaters, cross patch and tracking solutions.
